1. Introduction

A Half Century of Experience Integrating Greenhouse Structures and Systems

Rough Brothers Inc. has designed, engineered, manufactured and installed greenhouses and related systems since 1932. For over 75 years, we have provided the highest quality, best-crafted and most reliable greenhouse structures to the most successful growers, curators and researchers in the industry. Over the years, we have gained the necessary experience to help you select, construct, manage and maintain the optimal greenhouse structure and integrated greenhouse systems. We know how to design structures, material handling systems, heating, cooling, ventilation, irrigation systems and environmental controls - and we don't mind sharing our knowledge.

Our long-standing reputation for superior quality at Rough Brothers is something we are proud of. We work with hundreds of universities and schools, research facilities, retail garden centers, commercial growers and conservatories throughout the country.
