## 1. Introduction

### **Quality and flexibility in design sets us apart in the field of curtain systems.**

Rough Brothers can provide shade, heat retention and blackout curtain systems for both standard and custom applications.

From a high profile project in our nation's capital to the local retail center, Rough Brothers' Curtain Systems will provide the shade and blackout you, your crops, and your customers require. Whether curtains are needed for production, research, or personal comfort in the retail setting, Rough Brothers will design, provide, and install the system best suited to your needs.

Our curtain system designs are customer driven. With sliding and suspended system designs, Rough Brothers' Curtain Systems are designed to meet the needs of each application.

## 2. System Configurations

- Truss to truss
- Gutter to gutter
- Slope-flat-slope
- Sliding or suspended
- Rack and Pinion or cable driven
- Blackout, shade and/or energy retention
- Roll curtains

## 3. Benefits

- Natural light management
- Decreased heating costs
- Higher quality products
- More comfortable environment
- Reduced cooling costs
